Tiny House Living BOX SET 2 IN 1: 75 Genius Storage Ideas WITH PICTURES That Will Instantly Enlarge Your Small Space!

BOOK #1: Tiny House Living: 30 Genius Storage Ideas That Will Instantly Enlarge Your Small Space!

More and more people are having to move into smaller houses because they just can't afford a large home anymore. This is unfortunate, but it's becoming the norm and it's important to understand that with a smaller house comes less storage space ... or does it? A small home doesn't have to mean that you get rid of a lot of your stuff. Instead, turn your house into a haven. Keep the belongings you love and make them easier to find.

This book is going to help you understand many different ways that you can start using your space more effectively. You'll actually be surprised at how much space is hidden in your home (no matter how small it is) and you'll be amazed how many different ways there are to use those spaces if you're just a little bit creative.

BOOK #2: Tiny House Living: 45+ DIY Hacks to Maximize Your

Small Space in One Week!

Shipping containers are pretty darn inexpensive. They're everywhere, and they have a pretty usable amount of space that they make available as well, so they're sort of like building blocks for homes and other buildings that you may have to construct.

Because they're so cheap and they're made of metal, they're naturally reflective of most of the heat that the summer sun would pound into regular buildings and houses through the typically black shingled roof of those buildings. So shipping containers have relatively good insulation already built into them and ready to go.

But there are many benefits to building with one or many shipping containers beyond that. But strangely, you don't see every house on the block being constructed out of shipping containers. Why not though?

It's like building your house out of gigantic Lego pieces! Why hasn't anyone thought of building with these things before!? Why isn't building with shipping containers all the rage?
