Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation Ted G. Lewis

A scientific approach to the new field of critical infrastructure protection This book offers a unique scientific approach to the new field of critical infrastructure protection: it uses network theory, optimization theory, and simulation software to analyze and understand how infrastructure sectors evolve, where they are vulnerable, and how they can best be protected. The author demonstrates that infrastructure sectors as diverse as water, power, energy, telecommunications, and the Internet have remarkably similar structures. This observation leads to a rigorous approach to vulnerability analysis in all of these sectors. The analyst can then decide the best way to allocate limited funds to minimize risk, regardless of industry sector. The key question addressed in this timely book is: What should be protected and how? The author proposes that the answer lies in allocating a nation's scarce resources to the most critical components of each infra-structure--the so-called critical nodes. Using network theory as a foundation, readers learn how to identify a small handful of critical nodes and then allocate resources to reduce or eliminate risk across the entire sector. A comprehensive set of electronic media is provided on a CD-ROM in the back of the book that supports in-class and self-tutored instruction. Students can copy these professionally produced audio-video lectures onto a PC (Microsoft Windows(r) and Apple Macintosh(r) compatible) for repeated viewing at their own pace. Another unique feature of the book is the open-source software for demonstrating concepts and streamlining the math needed for vulnerability analysis. Updates, as well as a discussion forum, are available from www.CHDS.us. This book is essential for all corporate, government agency, and military professionals tasked with assessing vulnerability and developing and implementing protection systems. In addition, the book is recommended for upper-level undergraduate and graduate students studying national security, computing, and other disciplines where infrastructure security is an issue.

From reader reviews:

Willie Collier:

Book is to be different for every single grade. Book for children until eventually adult are different content. As you may know that book is very important for people. The book Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation ended up being making you to know about other expertise and of course you can take more information. It is extremely advantages for you. The reserve Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation is not only giving you considerably more new information but also to get your friend when you truly feel bored. You can spend your own spend time to read your book. Try to make relationship together with the book Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation. You never feel lose out for everything should you read some books.

Lisa Christopher:

Hey guys, do you really wants to finds a new book to study? May be the book with the subject Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation suitable to you? Often the book was written by famous writer in this era. Often the book untitled Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation is the one of several books which everyone read now. This book was inspired a number of people in the world. When you read this guide you will enter the new shape that you ever know ahead of. The author explained their concept in the simple way, and so all of people can easily to be aware of the core of this publication. This book will give you a lot of information about this world now. To help you see the represented of the world with this book.

Paige Robinson:

Reading can called thoughts hangout, why? Because if you find yourself reading a book specifically book entitled Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation your head will drift away trough every dimension, wandering in each and every aspect that maybe unidentified for but surely might be your mind friends. Imaging every word written in a publication then become one web form conclusion and explanation this maybe you never get ahead of. The Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation giving you another experience more than blown away your thoughts but also giving you useful details for your better life in this era. So now let us present to you the relaxing pattern at this point is your body and mind are going to be pleased when you are finished studying it, like winning a sport. Do you want to try this extraordinary shelling out spare time activity?

Ralph Smith:

Reading a book to become new life style in this year; every people loves to learn a book. When you go through a book you can get a lots of benefit. When you read guides, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what kinds

of book that you have read. If you wish to get information about your analysis, you can read education books, but if you want to entertain yourself read a fiction books, this sort of us novel, comics, and soon. The Critical Infrastructure Protection in Homeland Security: Defending a Networked Nation will give you a new experience in examining a book.
