Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World) Joanna I Lewis

As the greatest coal-producing and consuming nation in the world, China would seem an unlikely haven for wind power. Yet the country now boasts a world-class industry that promises to make low-carbon technology more affordable and available to all. Conducting an empirical study of China's remarkable transition and the possibility of replicating their model elsewhere, Joanna I. Lewis adds greater depth to a theoretical understanding of China's technological innovation systems and its current and future role in a globalized economy.

Lewis focuses on China's specific methods of international technology transfer, its forms of international cooperation and competition, and its implementation of effective policies promoting the development of a home-grown industry. Just a decade ago, China maintained only a handful of operating wind turbines—all imported from Europe and the United States. Today, the country is the largest wind power market in the world, with turbines made almost exclusively in its own factories.

Following this shift reveals how China's political leaders have responded to domestic energy challenges and how they may confront encroaching climate change. The nation's escalation of its wind power use also demonstrates China's ability to leapfrog to cleaner energy technologies—an option equally viable for other developing countries hoping to bypass gradual industrialization and the "technological lock-in" of hydrocarbon-intensive energy infrastructure. Though setbacks are possible, China could one day come to dominate global wind turbine sales, becoming a hub of technological innovation and a major instigator of low-carbon economic change.

From reader reviews:

Stanley Kamp:

Information is provisions for folks to get better life, information these days can get by anyone on everywhere. The information can be a expertise or any news even an issue. What people must be consider if those information which is within the former life are challenging be find than now's taking seriously which one would work to believe or which one the actual resource are convinced. If you receive the unstable resource then you have it as your main information there will be huge disadvantage for you. All those possibilities will not happen inside you if you take Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World) as the daily resource information.

Clinton Whitten:

Reading a book can be one of a lot of task that everyone in the world adores. Do you like reading book consequently. There are a lot of reasons why people fantastic. First reading a e-book will give you a lot of new details. When you read a book you will get new information because book is one of a number of ways to share the information as well as their idea. Second, examining a book will make an individual more imaginative. When you examining a book especially hype book the author will bring you to imagine the story how the figures do it anything. Third, you are able to share your knowledge to other folks. When you read this Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World), you could tells your family, friends and also soon about yours publication. Your knowledge can inspire the others, make them reading a publication.

Clarence Nelson:

Many people spending their time period by playing outside with friends, fun activity using family or just watching TV all day long. You can have new activity to pay your whole day by studying a book. Ugh, do you think reading a book can actually hard because you have to use the book everywhere? It ok you can have the e-book, delivering everywhere you want in your Smart phone. Like Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World) which is obtaining the e-book version. So , try out this book? Let's notice.

Jeffrey David:

Don't be worry in case you are afraid that this book can filled the space in your house, you could have it in e-book means, more simple and reachable. That Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World) can give you a lot of close friends because by you looking at this one book you have thing that they don't and make a person more like an interesting person. This book can be one of a step for you to get success. This e-book offer you information that probably your friend doesn't understand, by knowing more than other make you to be great

people. So , why hesitate? Let us have Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World).
