Master your Nikon D7000 with this go-anywhere guide

The Nikon D7000 is the first new mid-level Nikon DSLR camera that features full 1080p HD video with full-time autofocus. This full-color guide is packed with expert advice and full-color photos to both educate and inspire as you get better acquainted with your Nikon D7000. The handy trim size allows you to take it with you wherever you go so you can frequently refer to the top-notch tips, tricks, and techniques for getting unique and memorable photos and handling problematic shooting situations. Practical examples take you beyond the basics of the functions of each button and lavish photos exemplify the professional-level photographs that you can achieve.

- Walks you through the essential controls, features, and functions of the Nikon D7000 using step-by-step instructions
- Includes full-color images of each menu screen to reinforce your understanding
- Features full-color photos, how-to information, and no-fail formulas, all aimed at helping you get great digital photos with the D7000
- Includes a grey and color checker card to help you capture perfect color in any environment
- Delves into the more advanced features of the D7000

Author Tip: Using Ultra-Wide Angle Lenses

Ultra-wide angle lenses are a great way to add an interesting effect to your images. Ultra-wide lenses bend and distort your images, which allows you to portray your subjects in a way that the human eye can't see. This gives your photos an out of the ordinary look that attracts attention from even the most casual observer.

Getting up close to your subject distorts the perspective causing close-up areas to look huge and areas behind to look inordinately small. This is usually not recommended for portraits of people, but can be used for comedic effect and works especially well for pets.

Using an ultra-wide lens close-up pulls the viewer right into the scene and creates the illusion of extreme depth, which can give your photos an almost 3-D feeling.

Stepping back from the subject and photographing from further away stretches out the apparent distance between the camera and the subject causing short spans to look immense. Use this technique to add a sense of space and depth to your photos.

Since ultra-wide lenses fit so much of the scene into your photograph you really need to pay attention to your composition. Keep a close eye on the foreground and edges of the frame. An empty foreground and a small subject can make your image boring. Get up close and fill the foreground with your subject, but try to exclude distracting elements from the edges of the frame.

When shooting from a distance, your subject is sure to be small. Use the foreground to include leading lines that draw attention to the subject or to create a near-far dynamic that conveys the apparent distance between the subject and the camera.

Example: Motocross Rider

Example: Boston Terrier

Example: Skateboarder
