The 9th Italian Conference on Theoretical Computer Science (ICTCS 2005) was held at the Certosa di Pontignano, Siena, Italy, on October 12-14 2005. The Certosa di Pontignano is the conference center of the University of Siena; it is located 8 km away from the town and it is in the Chianti region. The Certosa is a place full of history (founded in the 15th century, it was set on fire a century later and reconstructed) and of valuable artworks, like frescoes of the Scuola Senese. Previous conferences took place in Pisa (1972), Mantova (1974 and 1989), L'Aquila (1992), Ravello (1995), Prato (1998), Turin (2001) and Bertinoro (2003). The conference aims at bringing together computer scientists, especially young researchers, to foster cooperation, exchange of ideas and results. Great efforts have been made to attract researchers from all over the world. The main topics of the conference cover all the fields of theoretical computer science and include analysis and design of algorithms, computability, computational complexity, cryptography, formal languages and automata, foundations of programming languages and program analysis, foundations of artificial intelligence and knowledge representation, foundations of web programming, natural computing paradigms (quantum computing, bioinformatics), parallel and distributed computation, program specification and verification, term rewriting, theory of concurrency, theory of databases, theory of logical design and layout, type theory, security, and symbolic and algebraic computation.
