Chemistry of Nanocarbons

Chemistry of Nanocarbons

During the last decade, fullerenes and carbon nanotubes have attracted special interest as new nanocarbons with novel properties. Because of their hollow caged structure, they can be used as containers for atoms and molecules, and nanotubes can be used as miniature test-tubes.

Chemistry of Nanocarbons presents the most up-to-date research on chemical aspects of nanometer-sized forms of carbon, with emphasis on fullerenes, nanotubes and nanohorns. All modern chemical aspects are mentioned, including noncovalent interactions, supramolecular assembly, dendrimers, nanocomposites, chirality, nanodevices, host-guest interactions, endohedral fullerenes, magnetic resonance imaging, nanodiamond particles and graphene. The book covers experimental and theoretical aspects of nanocarbons, as well as their uses and potential applications, ranging from molecular electronics to biology and medicine.

From reader reviews:

Barbara Marburger:

This book entitled Chemistry of Nanocarbons to be one of several books that will best seller in this year, that's because when you read this guide you can get a lot of benefit upon it. You will easily to buy this book in the book shop or you can order it by means of online. The publisher of this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Smartphone. So there is no reason to your account to past this reserve from your list.

Gertrude Barrett:

Often the book Chemistry of Nanocarbons has a lot of information on it. So when you read this book you can get a lot of benefit. The book was written by the very famous author. Mcdougal makes some research previous to write this book. This particular book very easy to read you can obtain the point easily after perusing this book.

Thomas Daniels:

Is it an individual who having spare time and then spend it whole day by means of watching television programs or just laying on the bed? Do you need something new? This Chemistry of Nanocarbons can be the answer, oh how comes? It's a book you know. You are therefore out of date, spending your spare time by reading in this completely new era is common not a nerd activity. So what these publications have than the others?

Brooks Davis:

As we know that book is important thing to add our information for everything. By a publication we can know everything you want. A book is a set of written, printed, illustrated or perhaps blank sheet. Every year has been exactly added. This e-book Chemistry of Nanocarbons was filled in relation to science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has various feel when they reading some sort of book. If you know how big benefit of a book, you can truly feel enjoy to read a book. In the modern era like currently, many ways to get book that you wanted.
