Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition

David Elizandro, Hamdy Taha

Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition David Elizandro, Hamdy Taha

Basic approaches to discrete simulation have been process simulation languages (e.g., GPSS) and event-scheduling type (e.g., SIMSCRIPT). The trade-offs are that event-scheduling languages offer more modeling flexibility and process-oriented languages are more intuitive to the user. With these considerations in mind, authors David Elizandro and Hamdy Taha embarked on the development of a new discrete simulation environment that is easy to use, yet flexible enough to model complex production systems. They introduced this environment, Design Environment for Event Driven Simulation (DEEDS), in *Simulation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA*. The DEEDS environment is itself an Excel/VBA add-in.

Based on this foundation, the second edition, now titled **Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA** incorporates the use of discrete simulation to statistically analyze a system and render the most efficient time sequences, designs, upgrades, and operations. This updated edition includes new visualization graphics for DEEDS software, improvements in the optimization of the simulation algorithms, a new chapter on queuing models, and an Excel 2007 version of the DEEDS software. Organized into three parts, the book presents concepts of discrete simulation, covers DEEDS, and discusses a variety of applications using DEEDS.

The flexibility of DEEDS makes it a great tool for students or novices to learn concepts of discrete simulation and this book can form the basis of an introductory undergraduate course on simulation. The expanded depth of coverage in the second edition gives it a richness other introductory texts do not have and provides practitioners a reference for their simulation projects. It may also be used as a research tool by faculty and graduate students who are interested in "optimizing" production systems.

From reader reviews:

James McDonald:

The book Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition make you feel enjoy for your spare time. You can utilize to make your capable considerably more increase. Book can to be your best friend when you getting anxiety or having big problem using your subject. If you can make reading through a book Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition to become your habit, you can get more advantages, like add your current capable, increase your knowledge about several or all subjects. You may know everything if you like start and read a guide Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition. Kinds of book are a lot of. It means that, science book or encyclopedia or others. So , how do you think about this reserve?

Virginia Benson:

What do you regarding book? It is not important with you? Or just adding material if you want something to explain what the one you have problem? How about your time? Or are you busy individual? If you don't have spare time to do others business, it is make one feel bored faster. And you have free time? What did you do? Every person has many questions above. They have to answer that question mainly because just their can do that will. It said that about e-book. Book is familiar on every person. Yes, it is proper. Because start from on kindergarten until university need this kind of Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition to read.

Jeanie Clark:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their down time with their family, or all their friends. Usually they carrying out activity like watching television, planning to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? May be reading a book might be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try look for book, may be the reserve untitled Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition can be excellent book to read. May be it might be best activity to you.

Jose Johnson:

Are you kind of occupied person, only have 10 or maybe 15 minute in your time to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you are receiving problem with the book than can satisfy your small amount of time to read it because all this time you only find reserve that need more time to be study. Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition can be your answer because it can be read by you actually who have those short extra time

problems.
