Pseudo-Differential Operators, Generalized Functions and Asymptotics

Pseudo-Differential Operators, Generalized Functions and Asymptotics

This volume consists of twenty peer-reviewed papers from the special session on pseudodifferential operators and the special session on generalized functions and asymptotics at the Eighth Congress of ISAAC held at the Peoples' Friendship University of Russia in Moscow on August 22-27, 2011. The category of papers on pseudo-differential operators contains such topics as elliptic operators assigned to diffeomorphisms of smooth manifolds, analysis on singular manifolds with edges, heat kernels and Green functions of sub-Laplacians on the Heisenberg group and Lie groups with more complexities than but closely related to the Heisenberg group, L_p -boundedness of pseudo-differential operators on the torus, and pseudo-differential operators related to time-frequency analysis. The second group of papers contains various classes of distributions and algebras of generalized functions with applications in linear and nonlinear differential equations, initial value problems and boundary value problems, stochastic and Malliavin-type differential equations. This second group of papers are related to the third collection of papers via the setting of Colombeau-type spaces and algebras in which microlocal analysis is developed by means of techniques in asymptotics. The volume contains the synergies of the three areas treated and is a useful complement to volumes 155, 164, 172, 189, 205 and 213 published in the same series in, respectively, 2004, 2006, 2007, 2009, 2010 and 2011.

From reader reviews:

Toni Styer:

In this 21st millennium, people become competitive in each way. By being competitive right now, people have to do something to make all of them survive, being in the middle of typically the crowded place and notice by surrounding. One thing that sometimes many people have underestimated this for a while is reading. That's why, by reading a publication your ability to survive enhance then having chance to endure than other is high. For yourself who want to start reading a book, we give you this specific Pseudo-Differential Operators, Generalized Functions and Asymptotics book as starter and daily reading book. Why, because this book is more than just a book.

Luis Martin:

The particular book Pseudo-Differential Operators, Generalized Functions and Asymptotics has a lot of info on it. So when you check out this book you can get a lot of profit. The book was published by the very famous author. This author makes some research previous to write this book. This kind of book very easy to read you will get the point easily after reading this book.

Claire Davis:

As we know that book is an important thing to add our know-how for everything. By an e-book we can know everything we would like. A book is a list of written, printed, illustrated as well as blank sheet. Every year has been exactly added. This publication Pseudo-Differential Operators, Generalized Functions and Asymptotics was filled regarding science. Spend your spare time to add your knowledge about your scientific research competence. Some people have diverse feelings when they read any book. If you know how big benefit of a book, you can really feel enjoy to read a book. In the modern era like now, many ways to get a book that you just wanted.

Henry Buford:

That guide can make you to feel relax. This kind of book Pseudo-Differential Operators, Generalized Functions and Asymptotics was brightly colored and of course has pictures on there. As we know that book Pseudo-Differential Operators, Generalized Functions and Asymptotics has many kinds or genres. Start from kids until young adults. For example Naruto or Investigator Conan you can read and think you are the character on there. Therefore not all of books tend to be make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for you and try to like reading this.
