Self-Organizing Networks (SON): Self-Planning, Self-Optimization and Self-Healing for GSM, UMTS and LTE

Self-Organizing Networks (SON): Self-Planning, Self-Optimization and Self-Healing for GSM, UMTS and LTE

With the current explosion in network traffic, and mounting pressure on operators' business case, Self-Organizing Networks (SON) play a crucial role. They are conceived to minimize human intervention in engineering processes and at the same time improve system performance to maximize Return-on-Investment (ROI) and secure customer loyalty.

Written by leading experts in the planning and optimization of Multi-Technology and Multi-Vendor wireless networks, this book describes the architecture of Multi-Technology SON for GSM, UMTS and LTE, along with the enabling technologies for SON planning, optimization and healing. This is presented mainly from a technology point of view, but also covers some critical business aspects, such as the ROI of the proposed SON functionalities and Use Cases.

Key features:

- Follows a truly Multi-Technology approach: covering not only LTE, but also GSM and UMTS, including architectural considerations of deploying SON in today's GSM and UMTS networks
- Features detailed discussions about the relevant trade-offs in each Use Case
- Includes field results of today's GSM and UMTS SON implementations in live networks
- Addresses the calculation of ROI for Multi-Technology SON, contributing to a more complete and strategic view of the SON paradigm

This book will appeal to network planners, optimization engineers, technical/strategy managers with operators and R&D/system engineers at infrastructure and software vendors. It will also be a useful resource for postgraduate students and researchers in automated wireless network planning and optimization.

From reader reviews:

Lisa Streeter:

This book untitled Self-Organizing Networks (SON): Self-Planning, Self-Optimization and Self-Healing for GSM, UMTS and LTE to be one of several books that best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy this particular book in the book retailer or you can order it by way of online. The publisher on this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Mobile phone. So there is no reason to you personally to past this guide from your list.

Clara Lee:

Self-Organizing Networks (SON): Self-Planning, Self-Optimization and Self-Healing for GSM, UMTS and LTE can be one of your basic books that are good idea. We recommend that straight away because this book has good vocabulary that may increase your knowledge in words, easy to understand, bit entertaining but delivering the information. The article writer giving his/her effort to place every word into enjoyment arrangement in writing Self-Organizing Networks (SON): Self-Planning, Self-Optimization and Self-Healing for GSM, UMTS and LTE nevertheless doesn't forget the main position, giving the reader the hottest in addition to based confirm resource details that maybe you can be among it. This great information can drawn you into new stage of crucial imagining.

Eva Byrd:

In this time globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The book that recommended to you is Self-Organizing Networks (SON): Self-Planning, Self-Optimization and Self-Healing for GSM, UMTS and LTE this reserve consist a lot of the information of the condition of this world now. This kind of book was represented how do the world has grown up. The dialect styles that writer value to explain it is easy to understand. The actual writer made some research when he makes this book. This is why this book suited all of you.

Helen Green:

Some people said that they feel bored stiff when they reading a e-book. They are directly felt this when they get a half elements of the book. You can choose the particular book Self-Organizing Networks (SON): Self-Planning, Self-Optimization and Self-Healing for GSM, UMTS and LTE to make your reading is interesting. Your own skill of reading proficiency is developing when you like reading. Try to choose very simple book to make you enjoy to read it and mingle the impression about book and reading especially. It is to be very first opinion for you to like to open up a book and study it. Beside that the publication Self-Organizing

Networks (SON): Self-Planning, Self-Optimization and Self-Healing for GSM, UMTS and LTE can to be your friend when you're really feel alone and confuse in doing what must you're doing of that time.
