An Introduction to the Study of Stellar Structure (Dover Books on Astronomy)

S. Chandrasekhar, *Space*

An Introduction to the Study of Stellar Structure (Dover Books on Astronomy) S. Chandrasekhar, *Space*

In this monograph a leading modern astrophysicist explores a problem basic to stellar dynamics: What is the relationship between loss of energy, mass, and radius of stars in the steady state?

The monograph is divided into two distinct parts. In chapters i-iv, Chandrasekhar presents the "classical" background necessary to his argument: the laws of thermodynamics (from Carathéodory's rigorous axiomatic standpoint), adiabatic and polytropic laws, and the work of Ritter, Emden, Kelvin, and others who developed the applied mathematics of stellar structure. Chapters v-xii discuss modern results: the formal theory of radiation, the equations of radiative equilibrium, the luminosity formula, the theory of stellar envelopes, Gibbs statistical mechanics (the quantum mechanical version), white dwarfs, etc. The closing chapter outlines some general trends in current investigations of the problem.

Appendixes cover physical and astronomical constants; the masses of light atoms; the masses, luminosities, and radii of the stars, derived hydrogen contents, central densities and central temperatures, and tables of white dwarf functions.

"Extremely interesting. It reaches the highest level of scientific merit." — *Bulletin, American Mathematical Society*.

From reader reviews:

Adele Rowan:

As people who live in the particular modest era should be upgrade about what going on or info even knowledge to make them keep up with the era which can be always change and move forward. Some of you maybe will certainly update themselves by reading through books. It is a good choice in your case but the problems coming to an individual is you don't know which you should start with. This An Introduction to the Study of Stellar Structure (Dover Books on Astronomy) is our recommendation so you keep up with the world. Why, since this book serves what you want and want in this era.

Rana Jensen:

Spent a free time and energy to be fun activity to do! A lot of people spent their spare time with their family, or their own friends. Usually they accomplishing activity like watching television, likely to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your free time/ holiday? May be reading a book may be option to fill your totally free time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to consider look for book, may be the guide untitled An Introduction to the Study of Stellar Structure (Dover Books on Astronomy) can be good book to read. May be it might be best activity to you.

Loren Hatmaker:

A lot of people always spent their particular free time to vacation or go to the outside with them loved ones or their friend. Were you aware? Many a lot of people spent they free time just watching TV, or maybe playing video games all day long. If you need to try to find a new activity here is look different you can read any book. It is really fun in your case. If you enjoy the book that you just read you can spent 24 hours a day to reading a guide. The book An Introduction to the Study of Stellar Structure (Dover Books on Astronomy) it is extremely good to read. There are a lot of folks that recommended this book. We were holding enjoying reading this book. If you did not have enough space to develop this book you can buy often the e-book. You can m0ore simply to read this book from your smart phone. The price is not very costly but this book possesses high quality.

Debra McGregor:

It is possible to spend your free time to see this book this reserve. This An Introduction to the Study of Stellar Structure (Dover Books on Astronomy) is simple to bring you can read it in the park your car, in the beach, train and also soon. If you did not get much space to bring often the printed book, you can buy the particular e-book. It is make you easier to read it. You can save the particular book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.
