Derived from its parent book "Clinical Examination" by Epstein et al, this pocket book is designed to be of use as a review guide for those who have used the big textbook. In its own right, it is expected to be a useful memory aid for nurses, physios, paramedics and medical students. The book covers most of the parent book in note form, omitting anatomy and physiology and colour photos. There is a summary of the examination of adult and child and focus is placed on questions to ask and possible diagnosis.
