Practical Programming for Strength Training Mark Rippetoe, Andy Baker

There is a difference between Exercise and Training. *Exercise* is physical activity for its own sake, a workout done for the effect it produces today, during the workout or right after you're through. *Training* is physical activity done with a longer-term goal in mind, the constituent workouts of which are specifically designed to produce that goal. Training is how athletes prepare to win, and how all motivated people approach physical preparation.
