## **Survival Analysis Using S: Analysis of Time-to-Event Data (Chapman & Hall/CRC Texts in Statistical Science)** Mara Tableman, Jong Sung Kim

Survival Analysis Using S: Analysis of Time-to-Event Data is designed as a text for a one-semester or one-quarter course in survival analysis for upper-level or graduate students in statistics, biostatistics, and epidemiology. Prerequisites are a standard pre-calculus first course in probability and statistics, and a course in applied linear regression models. No prior knowledge of S or R is assumed. A wide choice of exercises is included, some intended for more advanced students with a first course in mathematical statistics.

The authors emphasize parametric log-linear models, while also detailing nonparametric procedures along with model building and data diagnostics. Medical and public health researchers will find the discussion of cut point analysis with bootstrap validation, competing risks and the cumulative incidence estimator, and the analysis of left-truncated and right-censored data invaluable. The bootstrap procedure checks robustness of cut point analysis and determines cut point(s).

In a chapter written by Stephen Portnoy, censored regression quantiles - a new nonparametric regression methodology (2003) - is developed to identify important forms of population heterogeneity and to detect departures from traditional Cox models. By generalizing the Kaplan-Meier estimator to regression models for conditional quantiles, this methods provides a valuable complement to traditional Cox proportional hazards approaches.

### **From reader reviews:**

#### **Helen Perez:**

The book Survival Analysis Using S: Analysis of Time-to-Event Data (Chapman & Hall/CRC Texts in Statistical Science) can give more knowledge and information about everything you want. So just why must we leave a good thing like a book Survival Analysis Using S: Analysis of Time-to-Event Data (Chapman & Hall/CRC Texts in Statistical Science)? A number of you have a different opinion about publication. But one aim that will book can give many information for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or information that you take for that, it is possible to give for each other; you can share all of these. Book Survival Analysis Using S: Analysis of Time-to-Event Data (Chapman & Hall/CRC Texts in Statistical Science) has simple shape but you know: it has great and big function for you. You can search the enormous world by start and read a guide. So it is very wonderful.

#### **Linda Wood:**

Do you have something that you want such as book? The reserve lovers usually prefer to pick book like comic, short story and the biggest you are novel. Now, why not seeking Survival Analysis Using S: Analysis of Time-to-Event Data (Chapman & Hall/CRC Texts in Statistical Science) that give your pleasure preference will be satisfied through reading this book. Reading habit all over the world can be said as the means for people to know world much better then how they react in the direction of the world. It can't be explained constantly that reading habit only for the geeky individual but for all of you who wants to become success person. So , for all of you who want to start examining as your good habit, you may pick Survival Analysis Using S: Analysis of Time-to-Event Data (Chapman & Hall/CRC Texts in Statistical Science) become your starter.

#### **Fanny Rutledge:**

You may get this Survival Analysis Using S: Analysis of Time-to-Event Data (Chapman & Hall/CRC Texts in Statistical Science) by browse the bookstore or Mall. Just viewing or reviewing it might to be your solve difficulty if you get difficulties on your knowledge. Kinds of this reserve are various. Not only through written or printed but in addition can you enjoy this book by means of e-book. In the modern era just like now, you just looking by your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose appropriate ways for you.

#### **Terrie Newlin:**

What is your hobby? Have you heard that will question when you got pupils? We believe that that question was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And you also know that little person like reading or as looking at become their hobby. You need to know that reading is very important along with book as to be the thing. Book is important thing to increase you knowledge,

except your own personal teacher or lecturer. You will find good news or update about something by book. Amount types of books that can you choose to use be your object. One of them is Survival Analysis Using S: Analysis of Time-to-Event Data (Chapman & Hall/CRC Texts in Statistical Science).
