Maths for Chemistry: A chemist's toolkit of calculations Paul Monk, Lindsey J. Munro

Mathematical skills and concepts lie at the heart of chemistry; however, they are also often the aspects of the subject that students fear the most. Now in a new edition, *Maths for Chemistry* addresses the challenges faced by many students in acquiring the math skills necessary to gain a full understanding of chemistry. Working from basic yet essential principles, this unique text builds students' confidence by leading them through the subject in a steady, progressive way, moving from basic algebra all the way to quantum mathematics. Employing a modular structure, authors Paul Monk and Lindsey J. Munro present the material in short, manageable sections in order to keep the content as accessible as possible.

Opening with an introduction to the "language" of math and the fundamental rules of algebra, *Maths for Chemistry* goes on to cover powers, indices, logs and exponential functions, graphical functions, and trigonometry before leading students through both differentiation and integration and on to quantum mathematics. It is the first book of its kind to use chemical examples throughout in order to demonstrate the relevance of mathematical concepts to the study of chemistry. The volume is enhanced by definitions of all key terms, self-check questions, and extensive end-of-chapter problems. A Companion Website features additional resources for both students and instructors.

From reader reviews:

David Binkley:

The e-book with title Maths for Chemistry: A chemist's toolkit of calculations possesses a lot of information that you can study it. You can get a lot of benefit after read this book. This specific book exist new know-how the information that exist in this guide represented the condition of the world today. That is important to you to understand how the improvement of the world. This kind of book will bring you throughout new era of the globalization. You can read the e-book with your smart phone, so you can read the item anywhere you want.

Edwin Courville:

Beside that Maths for Chemistry: A chemist's toolkit of calculations in your phone, it can give you a way to get more close to the new knowledge or details. The information and the knowledge you may got here is fresh through the oven so don't become worry if you feel like an aged people live in narrow village. It is good thing to have Maths for Chemistry: A chemist's toolkit of calculations because this book offers to you readable information. Do you at times have book but you don't get what it's exactly about. Oh come on, that would not happen if you have this inside your hand. The Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss the idea? Find this book in addition to read it from now!

Joseph Gabriel:

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you may have it in e-book method, more simple and reachable. That Maths for Chemistry: A chemist's toolkit of calculations can give you a lot of pals because by you considering this one book you have factor that they don't and make anyone more like an interesting person. That book can be one of one step for you to get success. This reserve offer you information that possibly your friend doesn't realize, by knowing more than other make you to be great folks. So , why hesitate? We need to have Maths for Chemistry: A chemist's toolkit of calculations.

Lise Callicoat:

As a scholar exactly feel bored to be able to reading. If their teacher asked them to go to the library or to make summary for some publication, they are complained. Just very little students that has reading's heart and soul or real their pastime. They just do what the educator want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that studying is not important, boring and can't see colorful images on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this Maths for Chemistry: A chemist's toolkit of calculations can make you feel more interested to read.
