Scientists Confront Creationism

“A fascinating and timely book which demonstrates once and for all why ‘scientific’ creationism is not only bad science but also bad theology—and in the process spells out the principles that guide genuine discovery. Basically, an exposé of all pseudoscience. —John Pfeiffer, author of *The Emergence of Man*

The recent massive attack by fundamentalist Christians on the teaching of evolution in the schools has left scientists indignant and somewhat bewildered. Creationist arguments have seemed to them a compound of ignorance and malevolence, and, indeed, there has been both confusion and dishonesty in the creationist attack. First, there has been a confusion, partly deliberate, of the *fact* that organisms have evolved with *theories* about the detailed mechanics of the process. The facts of evolution are clear and are not disputed by any serious scientific worker.
