Excerpt from The History of South America From Its Discovery to the Present Time

It is a certain fact, unfortunately, that since Robertson, a respectable historian of the last century, no one has seriously undertaken to write the History of America, and especially of South America, of which the states, formerly Spanish colonies, with the exception of Brazil, are now republics almost unknown to Europeans. It must be confessed that their apathetic sons have not sufficiently exerted themselves to dissipate or rectify the erroneous and disdainful opinion that the Europeans have formed of our America, nor - and this is most important - to make known to each other nations and states closely related by origin, and natural allies by their interests, to all of whom, undoubtedly, days of prosperity and glory, of liberty and real aggrandisement, are reserved in the future, if they know how to profit by the lessons of history.

To meet this need we have decided to write the history of our Fatherland, South America, that country which Columbus thought was Paradise, and which is the jewel of the universe, without being terrified by the grave difficulties that it was necessary to confront in order to bring it to a successful issue; difficulties, we confess, that we should not have attempted to overcome without the generous solicitude and lively desire by which we were animated to render by it a real service to our beloved country.
