Neonatal Monitoring Technologies: Design for Integrated Solutions Wei Chen

Neonatal monitoring refers to the monitoring of vital physiological parameters of premature infants and full-term infants that are critically ill. In the last decades, several important treatment modalities emerged that had a substantial impact on the mortality of prematurely born infants. However, there is a concomitant increase of neurobehavioral problems on long-term follow-up.

Neonatal Monitoring Technologies: Design for Integrated Solutions presents a unique integration of knowledge from multidisciplinary fields of engineering, industrial design, and medical science for the healthcare of a specific user group. This comprehensive collection will support audiences ranging from clinical and medical professionals, academic researchers and students, technical professionals and managers, and policymakers of different sectors.
