Treating Eating Problems of Children W/ Autism Spectrum Disorders and Developmental Disabilities: Interventions for Professionals and Parents Keith E. Williams

A child's incessant screaming, spitting, and food throwing during mealtime are enough to frustrate any parent or caregiver! Continuous resistance to eating not only leads to malnourishment, but physical and intellectual developmental become additional concerns. Invariably, the underlying reason(s) for refusing to eat will differ from child to child, so the focus should be on improving or resolving the eating problem. This is a two-part book written for caregivers and professionals who work with children with feeding problems. It presents behavioral interventions and approaches on solving a child's resistance to eating. * Part One was specifically written for teachers, parents, and caregivers with no prior professional experience or training on feeding problems. * Part Two was written for professionals, providing detailed information on how to apply behavioral assessment and developing individualized interventions based on a child's eating behaviors. The behavioral interventions and procedures presented in this book can also be integrated into oral motor or dysphagia therapy. Includes references and brief descriptions.
