Plant Tissue Culture, Development, and Biotechnology

Plant Tissue Culture, Development, and Biotechnology

Under the vast umbrella of Plant Sciences resides a plethora of highly specialized fields. Botanists, agronomists, horticulturists, geneticists, and physiologists each employ a different approach to the study of plants and each for a different end goal. Yet all will find themselves in the laboratory engaging in what can broadly be termed biotechnology.

Addressing a wide variety of related topics, **Plant Tissue Culture, Development, and Biotechnology** gives the practical and technical knowledge needed to train the next generation of plant scientists regardless of their ultimate specialization. With the detailed perspectives and hands-on training signature to the authors' previous bestselling books, *Plant Development and Biotechnology* and *Plant Tissue Culture Concepts and Laboratory Exercises*, this book discusses relevant concepts supported by demonstrative laboratory experiments. It provides critical thinking questions, concept boxes highlighting important ideas, and procedure boxes giving precise instruction for experiments, including step-by-step procedures, such as the proper microscope use with digital photography, along with anticipated results, and a list of materials needed to perform them.

Integrating traditional plant sciences with recent advances in plant tissue culture, development, and biotechnology, chapters address germplasm preservation, plant growth regulators, embryo rescue, micropropagation of roses, haploid cultures, and transformation of meristems. Going beyond the scope of a simple laboratory manual, this book also considers special topics such as copyrights, patents, legalities, trade secrets, and the business of biotechnology.

Focusing on plant culture development and its applications in biotechnology across a myriad of plant science specialties, this text uses a broad range of species and practical laboratory exercises to make it useful for anyone engaged in the plant sciences.

From reader reviews:

Roberta Petty:

Nowadays reading books be than want or need but also become a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge even the information inside the book that will improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want get more knowledge just go with knowledge books but if you want sense happy read one together with theme for entertaining including comic or novel. The Plant Tissue Culture, Development, and Biotechnology is kind of reserve which is giving the reader unforeseen experience.

Kina Chatman:

Can you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Aim to pick one book that you just dont know the inside because don't assess book by its include may doesn't work here is difficult job because you are afraid that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer might be Plant Tissue Culture, Development, and Biotechnology why because the amazing cover that make you consider concerning the content will not disappoint anyone. The inside or content is fantastic as the outside or maybe cover. Your reading 6th sense will directly direct you to pick up this book.

Robert Knight:

Reading a book to be new life style in this 12 months; every people loves to go through a book. When you read a book you can get a lots of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your examine, you can read education books, but if you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, and also soon. The Plant Tissue Culture, Development, and Biotechnology provide you with new experience in looking at a book.

Lashunda McCloud:

As a university student exactly feel bored to be able to reading. If their teacher asked them to go to the library in order to make summary for some book, they are complained. Just small students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to there but nothing reading really. Any students feel that reading through is not important, boring and can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Plant Tissue Culture, Development, and Biotechnology can make you truly feel more interested to read.
