US Small Arms in World War II: A photographic history of the weapons in action (General Military)

Tom Laemlein, Dale Dye

From the humorous to the poignant, this incredible collection of wartime images reveals ordinary GIs on the frontline. From the deserts of North Africa to Normandy and from Guadalcanal to Iwo Jima, every theater of war is covered and each image details the small arms that the average GI carried with him to wage war and win an historic victory. All the key small arms, from the commonplace ³Grease Gun² to the rare Johnson rifle, and including pistols, rifles, carbines, combat shotguns, automatic rifles and machine guns are included. Tom Laemlein has created a unique photo study that draws together a rare collection of classic images (many never before seen). These images together with a short introduction to each weapon tells the combat story of the US Army at war.
