Atomic Force Microscopy Based Nanorobotics: Modelling, Simulation, Setup Building and Experiments (Springer Tracts in Advanced Robotics) Hui Xie, Cagdas Onal, Stéphane Régnier, Metin Sitti

The atomic force microscope (AFM) has been successfully used to perform nanorobotic manipulation operations on nanoscale entities such as particles, nanotubes, nanowires, nanocrystals, and DNA since 1990s.

There have been many progress on modeling, imaging, teleoperated or automated control, human-machine interfacing, instrumentation, and applications of AFM based nanorobotic manipulation systems in literature. This book aims to include all of such state-of-the-art progress in an organized, structured, and detailed manner as a reference book and also potentially a textbook in nanorobotics and any other nanoscale dynamics, systems and controls related research and education.

Clearly written and well-organized, this text introduces designs and prototypes of the nanorobotic systems in detail with innovative principles of three-dimensional manipulation force microscopy and parallel imaging/manipulation force microscopy.

From reader reviews:

Cory Kyle:

Reading a book tends to be new life style within this era globalization. With studying you can get a lot of information that can give you benefit in your life. Together with book everyone in this world can certainly share their idea. Guides can also inspire a lot of people. Lots of author can inspire their reader with their story or their experience. Not only the storyline that share in the books. But also they write about advantage about something that you need example of this. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors in this world always try to improve their expertise in writing, they also doing some investigation before they write with their book. One of them is this Atomic Force Microscopy Based Nanorobotics: Modelling, Simulation, Setup Building and Experiments (Springer Tracts in Advanced Robotics).

Loren Velasco:

The book with title Atomic Force Microscopy Based Nanorobotics: Modelling, Simulation, Setup Building and Experiments (Springer Tracts in Advanced Robotics) includes a lot of information that you can learn it. You can get a lot of profit after read this book. This kind of book exist new know-how the information that exist in this reserve represented the condition of the world currently. That is important to you to learn how the improvement of the world. This particular book will bring you inside new era of the global growth. You can read the e-book on your own smart phone, so you can read the item anywhere you want.

Mary McDonald:

Atomic Force Microscopy Based Nanorobotics: Modelling, Simulation, Setup Building and Experiments (Springer Tracts in Advanced Robotics) can be one of your starter books that are good idea. All of us recommend that straight away because this reserve has good vocabulary which could increase your knowledge in words, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort to put every word into satisfaction arrangement in writing Atomic Force Microscopy Based Nanorobotics: Modelling, Simulation, Setup Building and Experiments (Springer Tracts in Advanced Robotics) yet doesn't forget the main stage, giving the reader the hottest along with based confirm resource facts that maybe you can be one among it. This great information may drawn you into fresh stage of crucial pondering.

Jennifer Barton:

Reading a book make you to get more knowledge as a result. You can take knowledge and information from the book. Book is created or printed or highlighted from each source that filled update of news. With this modern era like at this point, many ways to get information are available for you. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your

knowledge by that book. Ready to spend your spare time to spread out your book? Or just seeking the Atomic Force Microscopy Based Nanorobotics: Modelling, Simulation, Setup Building and Experiments (Springer Tracts in Advanced Robotics) when you required it?
