Cool Stuff Exploded Chris Woodford

The third installment of our visually stunning and incredibly successful Cool Stuff series will blow your mind. This super cool technology book deconstructs-or literally *explodes*-everyday objects so readers can see exactly how they work. Beautifully photographed spreads show a piece-by-piece breakdown of cell phones, computers, cars, and more, detailing how each part works and how they all fit together as a whole. This unique look at the items we use every day brings science, technology, and wonder to the fore, giving us all a great appreciation for how our twenty-first-century world works. Set into the cover is a CD-ROM containing animations of the "exploded" views featured in the book.
