Numbers and Proofs (Modular Mathematics Series) Reg Allenby

'Numbers and Proofs' presents a gentle introduction to the notion of proof to give the reader an understanding of how to decipher others' proofs as well as construct their own. Useful methods of proof are illustrated in the context of studying problems concerning mainly numbers (real, rational, complex and integers). An indispensable guide to all students of mathematics. Each proof is preceded by a discussion which is intended to show the reader the kind of thoughts they might have before any attempt proof is made. Established proofs which the student is in a better position to follow then follow.

Presented in the author's entertaining and informal style, and written to reflect the changing profile of students entering universities, this book will prove essential reading for all seeking an introduction to the notion of proof as well as giving a definitive guide to the more common forms. Stressing the importance of backing up "truths" found through experimentation, with logically sound and watertight arguments, it provides an ideal bridge to more complex undergraduate maths.

From reader reviews:

Irene Vaughan:

Spent a free the perfect time to be fun activity to do! A lot of people spent their sparetime with their family, or their friends. Usually they carrying out activity like watching television, planning to beach, or picnic inside the park. They actually doing same task every week. Do you feel it? Will you something different to fill your own personal free time/ holiday? Can be reading a book may be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to consider look for book, may be the publication untitled Numbers and Proofs (Modular Mathematics Series) can be good book to read. May be it is usually best activity to you.

Mandi Rice:

A lot of people always spent their very own free time to vacation as well as go to the outside with them family members or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, or even playing video games all day long. In order to try to find a new activity that's look different you can read a book. It is really fun for you. If you enjoy the book which you read you can spent all day every day to reading a guide. The book Numbers and Proofs (Modular Mathematics Series) it is extremely good to read. There are a lot of people who recommended this book. These folks were enjoying reading this book. When you did not have enough space bringing this book you can buy the actual e-book. You can m0ore very easily to read this book from a smart phone. The price is not too expensive but this book provides high quality.

Eddie Grabowski:

Reading can called mind hangout, why? Because if you find yourself reading a book specially book entitled Numbers and Proofs (Modular Mathematics Series) your brain will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely will become your mind friends. Imaging every word written in a e-book then become one type conclusion and explanation that maybe you never get ahead of. The Numbers and Proofs (Modular Mathematics Series) giving you an additional experience more than blown away the mind but also giving you useful facts for your better life on this era. So now let us show you the relaxing pattern here is your body and mind will likely be pleased when you are finished studying it, like winning a. Do you want to try this extraordinary wasting spare time activity?

Janice Evans:

Within this era which is the greater person or who has ability to do something more are more precious than other. Do you want to become among it? It is just simple way to have that. What you should do is just spending your time very little but quite enough to experience a look at some books. One of the books in the top list in your reading list is definitely Numbers and Proofs (Modular Mathematics Series). This book that is qualified as The Hungry Mountains can get you closer in turning into precious person. By looking way up and review this reserve you can get many advantages.
