Electromagnetic Fields in Unconventional Materials and Structures

Electromagnetic Fields in Unconventional Materials and Structures

This book will shape the course of electromagnetics research for decades to come. Fourteen leading researchers from five countries reveal their latest research results in detail and review parallel developments. The topics discussed, though unconventional today, are destined to attract great attention as shrinking device sizes make electromagnetic effects ever more important.

These topics include the rotation of polarization of electric waves by a twisted structure; homogenization of linear bianisotropic composite materials; novel free-space techniques to characterize complex mediums; sculptured thin films; electrodynamic properties of carbon nanotubes; and more.

Electromagnetic Fields in Unconventional Materials and Structures:

- * Focuses on geometry in both large and small scales
- * Provides a blueprint for electromagnetics research at the turn of the century
- * Features new results, comments, and prognostications on 21st century research
- * Includes more than 150 illustrations as well as hundreds of charts, tables, and references

From reader reviews:

Corey Gardner:

Playing with family in the park, coming to see the marine world or hanging out with close friends is thing that usually you may have done when you have spare time, after that why you don't try issue that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Electromagnetic Fields in Unconventional Materials and Structures, you can enjoy both. It is excellent combination right, you still wish to miss it? What kind of hangout type is it? Oh seriously its mind hangout people. What? Still don't get it, oh come on its referred to as reading friends.

Raymond Brown:

In this period of time globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of personal references to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher that will print many kinds of book. The book that recommended for your requirements is Electromagnetic Fields in Unconventional Materials and Structures this book consist a lot of the information from the condition of this world now. This kind of book was represented how do the world has grown up. The words styles that writer make usage of to explain it is easy to understand. Typically the writer made some study when he makes this book. That's why this book ideal all of you.

Joseph Esparza:

Many people spending their time frame by playing outside using friends, fun activity using family or just watching TV the entire day. You can have new activity to enjoy your whole day by studying a book. Ugh, do you think reading a book will surely hard because you have to accept the book everywhere? It all right you can have the e-book, getting everywhere you want in your Mobile phone. Like Electromagnetic Fields in Unconventional Materials and Structures which is obtaining the e-book version. So , try out this book? Let's observe.

Teresa Hanson:

Is it you who having spare time after that spend it whole day by simply watching television programs or just lying on the bed? Do you need something totally new? This Electromagnetic Fields in Unconventional Materials and Structures can be the answer, oh how comes? The new book you know. You are so out of date, spending your free time by reading in this brand-new era is common not a geek activity. So what these ebooks have than the others?
