Psychoanalysis Online 2: Impact of Technology on Development, Training, and Therapy (The Library of Technology and Mental Health)

Following on from the first volume, this is an international collaboration by psychotherapists and psychoanalysts who consider the impact of virtual reality on our society and the uses of communications technology for analytic treatment and professional training. Having examined the impact of communications technology on mental health and relationships, the authors explore its use in analytical treatment conducted on the telephone and over the internet, and review its problems and possibilities. They provide a multi-faceted view of it, an ethical stance in relation to it, and evidence from which to judge its effectiveness. Looking into the future they imagine a time when technology-supported analytic treatment may be not only convenient as a supplement to in-person treatment but also preferable for some patients and therapists in various circumstances.
